

# Hydrogen & MRET Water Generator

高富氢及低频共振水杯 A flask in hand, healthy for the whole family

## Nano Hydrogen Technology

A large number of free radicals are produced in the process of human metabolism, because part of the bad life habits deteriorates into peroxy free radicals. Hydrogen can selectively neutralize the malignant peroxy free radicals and become water to be excreted from the body, achieving the effect of delaying aging and curing diseases.

Hydrogen-oxygen separation technology can ensure that the residual chlorine and ozone produced in the electrolysis process are separated, and will not cause secondary harm to the human body. The saturated solubility of hydrogen in water is 1450PPB, and it can be increased to 3500PPB-5000PPB through nano-hydrogen technology. The higher the hydrogen concentration in water, the better. , 800-1500PPB has a health care effect on the human body, and more than 2200PPB has a therapeutic effect.

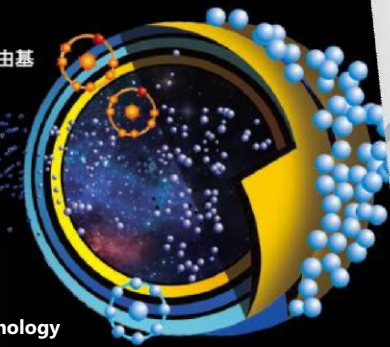

Hydrogen molecules and malignant peroxy free radicals combine to form water under the action of the body's own hydrogen catalytic enzymes

Only Nano Hydrogen Dissolving Technology can achieve this concentration

**3500PPB-5000PPB**

恶性氧自由基

## MRET Technology

- A biological water technology that can awaken the body's self-healing power
- A technology that can improve the elimination of cytotoxins from the blood
- A technology that can eliminate oxidative damage and delay aging
- A technology that can make low-frequency resonance water
- A biological water technology that can eliminate high radiation
- A technology that can change the bonding structure of cells
- A technology that does not add or touch the water body
- A technology that can aggregate water into cellular water

Improve four high-diabetes, hypertension, hyperlipidemia, hyperuricemia      Fresh flowers, plant growth, improve taste

Detox and beauty-deep hydration, promote absorption, remove acne, and expel toxins

Antibacterial and anti-inflammatory-kill bacteria, improve inflammation, clean wounds, and remove free radicals

Hangover and protect liver, sober up and refresh
