## FEMALE PLUS INGREDIENTS

### Sakura Powder

Rich in essential fatty acids, it repairs the skin's natural barriers to promote a smooth, supple skin. Sakura is ideal for a mature complexion, therapeutically regenerative; it is anti-aging, whitening, and is an anti-glycation agent which promotes collagen formation in the fibroblasts.

### Oligosaccharide

Oligosaccharides are also classified as a type of prebiotic, which is a compound that is not digested by the body but used as fuel and metabolized by the beneficial bacteria in the gut. Because most oligosaccharides are indigestible and act as prebiotics, they have been linked to a long list of health benefits, ranging from enhanced immune function to improved digestive health and beyond.

### Kacip Fatimah Powder

Kacip Fatimah is a popular herb in Malaysia that has been traditionally used in a number of women's health applications such as to improve libido, relieve postmenopausal symptoms, and to facilitate or hasten delivery in childbirth.

### Manjakani

Manjakani is known to have many benefits to the health of women's intimate organs as well as to address various illnesses of women. One of the functions is to treat fungus and act as a natural ingredient to make the female intimate organs become more elastic. The Benefits of Manjakani for Women Health maintaining the health of women's Intimate Organs, tighten miss V, overcoming dry miss V, family planning contraception and treating cysts.

### Soy Isoflavone

Features including natural soy isoflavone phytoestrogens and vitamins and other nutrients, can regulate the secretion of estrogen deficiency or surplus arising from the female endocrine disorders. Women can make the skin smooth, delicate, silky, full of elasticity; retard aging women, menopausal symptoms, improve menstrual discomfort, osteoporosis, elevated blood lipids, breast cancer, prostate cancer, heart disease, osteoporosis, cardiovascular disease. For high levels of estrogen, the performance of anti-hormonal activity, can prevent breast, endometrial, colon, prostate, lung and skin growth of cancer cells and leukemia, and other cardiovascular diseases. (Note : Pregnant women and lactating women not taking isoflavones.)

### Hithion

Main Functions of Hithion are serves as an antioxidant, removes free radicals, beauty the skin and also relieve muscle fatigue. Hithion can whiten and brighten your skin, increase skin elasticity, enhance protection against UV, reduce appearance of dark spots, increase production of type 1 collagen, prevent pimples and white heads and also enhance healing of wounds.

### Glisodin

Help maintain cellular health and protect against damage caused by oxidative stress, promote production of body's own antioxidants, protect against damage caused by oxidative stress, support healthy immune function, support skin health against photo-oxidative stress.

### Oxynea

Oxynea is a whole food concentrate of fruit and vegetable extracts providing polyphenols as in the daily consumption of 5 servings of fresh fruit and vegetables. It offers a wide spectrum of 100+ different polyphenols from plant-based extracts.

### Mirifica

Pueraria Mirifica is a plant that grows in Thailand and other parts of Southeast Asia. It's also known as Kwao Krua. For over 100 years, the roots of Pueraria Mirifica have been used in traditional Thai medicine to promote youthfulness and rejuvenation in both men and women. Certain plant compounds known as phytoestrogens make up the primary active components of Pueraria Mirifica. Pueraria Mirifica can relieve menopausal symptoms, support vaginal health, promotes bone health, improves antioxidant activity, have anticancer effects, promote heart health and support brain health.

### Lobata Powder

Lobata is a fast-growing vine, Pueraria is rich in isoflavones (daidzein) and isoflavone glycosides, compounds that promote general health and reduce the risk of several cancers and heart disease. According to traditional Thai medicine, this herb is effective for relieving the symptoms of old age, menopause and for beauty enhancement, breast enlargement, breast firmness, healthier menstruation, increase vaginal secretion, healthier hair, skin recovery, mammary pain.
