Chlorophyll
Plus Drink**

Hematopoiesis

Provide Vitamins

Maintain The Enzyme Activity

Detoxification

Anti-inflammatory Effect

Deodorizing Function

Physical resistance

Cellulose-Rich

Eight Health Effects Of Chlorophyll ...

1.

HEMATOPOIESIS : Chlorophyll is rich in trace elements of iron, is a natural blood raw materials, no chlorophyll, it can not create an endless stream of blood, with this body will occurs anemia.

2.

PROVIDE VITAMINS : Chlorophyll contains a lot of vitamin C and mineral, is indispensable to human life and activities of the material, also to maintain body fluids alkaline.

3.

MAINTAIN THE ENZYME ACTIVITY : Yeast, also known as "enzyme" is a catalyst for chemical changes the body for the synthesis of various chemical substances and decomposition of the work. If the enzyme deficiencies, some chemicals are not fully decomposition and composition, the per oxidation of free radicals, which damage the body's normal cells, leading to various diseases. The enzyme activity of chlorophyll can be maintained so that it play a strong antioxidant effect and protect against free radicals and aging.

4.

DETOXIFICATION : Chlorophyll is the best natural antidote, in all kinds of junk food contain preservatives, additives, flavors such as accumulation of toxins in the body and excreted in purifying the blood.

5.

ANTI-INFLAMMATORY EFFECT : Chlorophyll can also prevent infection and prevent the spread of inflammation, has bactericidal anti-inflammatory effect. For a lot of skin inflammation, especially inflammation, trauma, persistent gastric ulcer, enteritis, and have unexpected results.

6.

DEODORIZING FUNCTION : Another important role in chlorophyll is deodorizing, because it can inhibit the metabolism of sulphur compounds produced in the course. Drinking the right amount of green juice everyday can make the mouth, nasal cavity, the body gives off a bad breath, sweat, urine smelly, taste and other fecal odor disappears.

7.

PHYSICAL RESISTANCE : Chlorophyll in improving health, fitness and physical illnesses also have many effects. Such as to enhance the body's tolerance; have anti-aging, prevent cancer, prevention of gene mutations and other functions, is the guardian of human body health.

8.

CELLULOSE-RICH : Because the fibers in plant leaves together with the presence of chlorophyll, therefore, absorbing chlorophyll is equivalent to absorbing fiber at the same time.

Nobel Prize winners Dr. Richard Willstatter and Dr. Hans Fisher found that the chlorophyll molecules and human red blood cells is a molecule similar in structure, the only difference is the core of each atom of magnesium and iron atoms. Therefore, the consumption of chlorophyll on the maternal blood loss and those due to accidents will be very helpful.

Nutritionist Dr. Bernard Jensen, chlorophyll could get rid of residues of toxic pesticides and drugs, and combined with radioactive material and have them removed from the body. In addition, it also found that healthy people generally have a ratio of the number of blood cells is higher compared with the patients, but to absorb large amounts of chlorophyll, the number of blood cells of patients will increase, and health will be enhanced.

Beauty skin from England Journal of Medicine have made such a report: chlorophyll can help overcome internal infections and skin problems. Report of the magazine Surgery American States: Temple University in 1200 patients, using chlorophyll to treat a variety of disease, and found the effects to achieve very satisfactory results.
